Christian Bile

SOFTWARE ENGINEER | BACKEND, FULL-STACK & DATA / AI

Italian citizen · Paris, France · +33 6 68 15 03 92 · christian2tv@gmail.com · Portfolio

PROFESSIONAL PROFILE

Software Engineer with 5+ years of experience building enterprise applications, internal SaaS platforms and data-intensive solutions. Experienced across the full software lifecycle, from relational data modelling and backend APIs to frontend applications, containerisation and CI/CD. Strong hands-on background in Java/Spring Boot, Python, Go, React, Angular, SQL databases and cloud-native delivery, complemented by applied AI and deep-learning research.

TECHNICAL SKILLS

Languages	Java, Python, Go, C++, JavaScript, TypeScript, SQL
Backend & APIs	Spring Boot, FastAPI, Django, Node.js, REST, GraphQL, microservices
Frontend	React, Angular, HTML, CSS
Data engineering	pandas, OSRM, PostgreSQL, MySQL, MongoDB, Oracle SQL, SQL Server, Databricks
AI & research	Machine learning, deep learning, computer vision, explainable AI, data mining
Cloud & delivery	Docker, Kubernetes, GitLab CI/CD, Jenkins, Azure, Git
Engineering	System design, data modelling, API design, testing, Agile development

PROFESSIONAL EXPERIENCE

Software Engineer · Internal SaaS Platforms
Sep 2026 – Present

Latitude · Reims, France

- Design and build internal SaaS platforms used by engineering teams at a French small-satellite launch-vehicle company.
- Develop web workflows to configure launch vehicles for specific missions, track vehicle build and integration, and prepare and execute launch campaigns—replacing spreadsheet-based processes and undocumented team knowledge with traceable, versioned workflows.
- Own delivery across PostgreSQL/MySQL data models, Java/Spring Boot APIs and React frontends; containerise services with Docker and ship continuously through GitLab CI/CD.

Data Engineer · R&D;
Jun 2026 – Sep 2026

Delane SI · Paris, France

- Built the data foundation for R&D; on the geo-economic optimisation of healthcare access in French medical-desert areas, examining workforce incentives, travel distance, local demand and practitioner supply.
- Developed reproducible Python/pandas pipelines to ingest, clean and join public healthcare, demographic and geographic datasets.
- Computed road-network travel times at scale with OSRM and packaged the data workflows as Docker services, providing analysts and the optimisation model with a consistent, versioned dataset.

Software Engineer · Document Processing & Distribution
Mar 2024 – Apr 2026

AG2R LA MONDIALE · Esvres, France

- Designed and developed tools and platforms for processing individual documents and large batches, then distributing them through mail, letters, electronic document management and electronic-signature channels.
- Implemented Python batch-processing and distribution workflows, alongside Java backend services and Angular frontends for single-document processing.
- Worked in a nine-person Agile team; contributed to bug fixing and CI/CD and deployment workflows using GitLab, Jenkins and Kubernetes.

IT Consultant
Sep 2023 – Present

Adentis (formerly Epigone) · Paris, France

- Consulting engineer designing and delivering IT solutions for medium-sized and large enterprise clients.
- Epigone was acquired by Adentis. Client assignments include AG2R LA MONDIALE (March 2024–April 2026) and the current Latitude engagement.

Full-Stack Web Developer
Feb 2023 – Sep 2023

iKe Tech · Paris, France

- Designed and built a responsive digital-business-card sharing application from scratch as the sole engineer.
- Designed the database and developed a Python/FastAPI microservices backend with a Django and React frontend, delivering incrementally with GitHub version control.

Software Engineer · Backend
Jul 2022 – Feb 2023

imagino · Paris, France

- Implemented and extended backend features for a data-driven marketing SaaS, processing customer data through batch pipelines and supporting campaign statistics and activation across SMS, email, Google Ads and Facebook Ads.
- Developed with Go and Python across MongoDB, MySQL, PostgreSQL, Oracle SQL, Microsoft SQL Server and Databricks; worked in an Agile team with GitLab CI/CD and Azure.

Artificial Intelligence Engineer
Mar 2022 – Jun 2022

Tech2Heal · Paris, France

- Built AI and web solutions to monitor patients' health and alert clinicians in potential emergencies.
- Developed Python/FastAPI backend functionality and an Angular frontend, integrating GraphQL with FHIR-structured healthcare data in a four-person Agile team.

PROFESSIONAL EXPERIENCE · CONTINUED

Deep Learning Researcher
Apr 2021 – Sep 2021

INRIA · HyAIAI Research Project · Rennes, France

- Investigated links between incorrect predictions from deep neural-network classifiers and groups of highly activated neurons.
- Proposed a Python framework using discriminative pattern mining to identify neuron activation patterns associated with correct and incorrect classifications, with the aim of detecting potential future mispredictions.

Data Scientist
Apr 2020 – Sep 2020

Amadeus · Nice, France

- Developed machine-learning and deep-learning models to forecast airline customers' Customer Lifetime Value from traveller characteristics and purchasing behaviour.

Software Engineer
Jun 2018 – Sep 2019

SOGEA S.R.L. · Treviso, Italy

- Developed desktop applications and management systems used by more than 100 customers across multiple industries.
- Contributed to a desktop and tablet application automating clothing-production processes for a multinational fast-fashion company, using C++, Qt and PostgreSQL.

Full-Stack Web Developer
Oct 2017 – Jan 2018

Studio Com.unica · Padova, Italy

- Contributed to the system design and development of Mode, a web application connecting small fashion businesses with their customers.
- Built with Node.js, Angular, TypeScript and MongoDB; used GitHub for version control and Azure for deployment.

EDUCATION

2019 – 2021 **Master's Degree in Artificial Intelligence and Advanced Visual Computing**
École Polytechnique · Paris, France
Topics included statistical learning, data analysis, computer graphics, virtual and augmented reality, computer vision and robotics.

2014 – 2017 **Bachelor's Degree in Computer Science**
University of Padova · Padova, Italy
Coursework included programming, algorithms and data structures, databases, computer networks, web technologies and IT security.
