# CHRISTIAN BILE

**SOFTWARE ENGINEER | BACKEND · DISTRIBUTED SYSTEMS · PLATFORM ENGINEERING**

Italian citizen · EU work authorisation · +33 6 68 15 03 92 · christian2tv@gmail.com · Portfolio

## PROFESSIONAL PROFILE

Software Engineer with 5+ years of experience building enterprise applications, internal SaaS platforms and data-intensive systems. Experienced across the software lifecycle, from relational data modelling and backend APIs to frontend applications, containerisation and CI/CD. Strong hands-on background in Java/Spring Boot, Python, Go, React, Angular and SQL databases, complemented by applied AI and deep-learning research.

## TECHNICAL SKILLS

**Languages** Java, Python, Go, C++, JavaScript, TypeScript, SQL
**Backend & APIs** Spring Boot, FastAPI, Django, Node.js, REST, GraphQL, microservices
**Frontend** React, Angular, HTML, CSS
**Data & databases** pandas, OSRM, PostgreSQL, MySQL, MongoDB, Oracle SQL, SQL Server, Databricks
**Cloud & delivery** Docker, Kubernetes, GitLab CI/CD, Jenkins, Azure, Git
**Engineering** System design, data modelling, API design, testing, Agile
**AI** Machine learning, deep learning, computer vision, explainable AI, data mining

## PROFESSIONAL EXPERIENCE

**Software Engineer · Internal SaaS Platforms** — **Sep 2026 – Present**
*Latitude · Reims, France*
- Build internal SaaS platforms for engineering teams at a French small-satellite launch-vehicle company.
- Develop workflows to configure launch vehicles for missions, track build and integration, and prepare launch campaigns—replacing spreadsheets and undocumented knowledge with traceable, versioned workflows.
- Own PostgreSQL/MySQL data models, Java/Spring Boot APIs and React frontends; containerise services with Docker and deliver through GitLab CI/CD.

**Data Engineer · R&D;** — **Jun 2026 – Sep 2026**
*Delane SI · Paris, France*
- Built the data foundation for an R&D; project focused on geo-economic optimisation of healthcare access in French medical-desert areas.
- Developed reproducible Python/pandas pipelines to ingest, clean and join public healthcare, demographic and geographic datasets.
- Computed road-network travel times at scale with OSRM and packaged workflows as Docker services, providing consistent, versioned datasets.

**Software Engineer · Document Processing & Distribution** — **Mar 2024 – Apr 2026**
*AG2R LA MONDIALE · Esvres, France*
- Designed tools and platforms for processing individual documents and large batches, then distributing them through postal, electronic document-management and e-signature channels.
- Implemented Python batch-processing and distribution workflows alongside Java backend services and Angular interfaces for single-document processing.
- Worked in a nine-person Agile team; contributed to bug fixing, CI/CD and deployments using GitLab, Jenkins and Kubernetes.

**Software Engineering Consultant · Shared consulting operations** — **Sep 2023 – Present**
*Adentis & Epigone · France*
- Work across Adentis and Epigone under their shared consulting arrangement, designing and delivering software solutions for enterprise clients.
- Client assignments include AG2R LA MONDIALE (Mar 2024–Apr 2026) and Latitude (Sep 2026–Present).

**Full-Stack Web Developer** — **Feb 2023 – Sep 2023**
*iKe Tech · Paris, France*
- Designed and built a responsive digital-business-card sharing application from scratch as the sole engineer.
- Designed the database and developed a Python/FastAPI microservices backend with Django and React frontend components; delivered iteratively using GitHub.

## PROFESSIONAL EXPERIENCE · CONTINUED

**Software Engineer · Backend** — **Jul 2022 – Feb 2023**
*imagino · Paris, France*
- Implemented backend features for a data-driven marketing SaaS, processing customer data through batch pipelines and supporting campaign statistics and activation across SMS, email, Google Ads and Facebook Ads.
- Developed with Go and Python across MongoDB, MySQL, PostgreSQL, Oracle SQL, SQL Server and Databricks; used GitLab CI/CD and Azure in an Agile team.

**Artificial Intelligence Engineer** — **Mar 2022 – Jun 2022**
*Tech2Heal · Paris, France*
- Built AI and web solutions to monitor patients' health and alert clinicians to potential emergencies.
- Developed Python/FastAPI backend functionality and an Angular frontend, integrating GraphQL with FHIR-structured healthcare data.

**Deep Learning Researcher** — **Apr 2021 – Sep 2021**
*INRIA · HyAIAI research project · Rennes, France*
- Studied relationships between deep-neural-network misclassification and highly activated neuron groups.
- Proposed a Python framework using discriminative pattern mining to identify activation patterns associated with correct and incorrect classifications.

**Data Scientist** — **Apr 2020 – Sep 2020**
*Amadeus · Nice, France*
- Developed machine-learning and deep-learning models to predict airline customer lifetime value from traveller characteristics and purchasing behaviour.

**Software Engineer** — **Jun 2018 – Sep 2019**
*SOGEA S.R.L. · Treviso, Italy*
- Developed desktop applications and management systems used by more than 100 clients across several industries.
- Contributed to a desktop and tablet application automating textile-production processes for a multinational fashion company, using C++, Qt and PostgreSQL.

**Full-Stack Web Developer** — **Oct 2017 – Jan 2018**
*Studio Com.unica · Padua, Italy*
- Contributed to Mode, a web application connecting small fashion businesses with customers, using Node.js, Angular, TypeScript and MongoDB; managed code with GitHub and deployed on Azure.

## EDUCATION

**Master's Degree · Artificial Intelligence and Advanced Visual Computing** — **2019–2021**
École Polytechnique · Paris, France

**Bachelor's Degree · Computer Science** — **2014–2017**
University of Padua · Padua, Italy
